R6  
We sent R6 4 additional samples (from WO 1201015 and 1202001) so I wanted to know when we would find out if Propylene glycol was present in those samples (confirm Jennie's TIC).

R3 - Please check with Joe and find out what he was expecting before signature.

Subject: Validated Reports - Questions

Robin,  
Some questions....

Micro:

Week 5 validation report is in the Micro Validated Reports directory but I also need to lab data packages which I don't see in the Micro directory. Please let me know where to find the lab report. Moved to I:\ASQAB\_\_AT Team\dimock rc\Micro\Data Packages for Validation

NAREL:

Are there any new reports (posted in weeks 1 and 2)? There are no new reports in Fred's directory. I sent him an email to see if this is correct.

R9 March

Please make a 12067a directory under posted and move the March reports to that new directory. These have been posted. DONE

R6

There is one draft report - is that all we have so far? When is final report due/expected? Will they be sending EDD too? Also, if you are the one contacting on report status could you ask when we could expect an answer on the propylene glycol analysis? We also need to discuss with them how to report these. I have sent an email to Christy to see when the Final is coming. They have reported propylene glycol in the draft report, so I am not sure what the question is about that

one? FYI....I have not been corresponding with R6 up till now.

R3 - WO 1203001 - this has a lithium example.xls file and the notification of supplement report - should this move to 1202001? These have been deleted... this was just something I was testing.

R3 - 1202005 - need corrections to narrative and can send out Tuesday. Where are we with 1203001? I placed the glycol file with the rest of the case file. Working on corrections for 1202005 and not sure what to do with 1203001 glycol report since Joe hasn't signed it.  
Cindy
